PROFESSIONAL EXPERIENCE

Narayana Health India
Analyst – Advanced Analytics Sep 2025 – Present

- Developed **AI agents and bots** for Finance, including a **Fusion ERP** vendor master updater driven by MSMED compliance checks (yearly to monthly), cutting manual effort by **~20 hrs/week**.
- Built **Claude skills** for automated **dashboard pre-QA testing** and root-cause analysis of bugs, reducing analyst and QA effort by **~2 hours/day**.
- Built **Databricks** cube-based **dashboards** with **ECharts** for hospital and clinic operations (Service Queue Management, NABH accreditation, Post Consultation), improving workflow **turnaround time (TAT)**.
- Built an **AKI prediction model** on clinician-defined clinical parameters, achieving **~80% accuracy** to support doctors' decisions, plus a **Gemini LLM** etiology pipeline in **Python** with structured JSON output.
- Developed **live-streaming ITU risk score dashboards** that calculate patient risk in near real time so doctors can monitor and assess risk on time.
- Tuned **Druid and Trino** platforms and maintained dashboards on them, improving dashboard speed by **20%**; migrated Trino queries to **Databricks SQL**.

Assetmantle Bangalore, India
Data Application Engineer Feb 2025 – Aug 2025

- Created complex **SQL** queries by reverse-engineering business logic by analyzing **1000+ tables** and existing T-SQL stored procedures from Highrise ERP and generated custom SQL-based reports.
- Built and deployed **10+ Power BI dashboards** that translated complex real estate data into clear visualizations, driving a **50% increase** in data-informed decision-making.
- Architected an **ETL pipeline** (Cloud Storage, Cloud SQL) that powered a new front-end application, cutting **manual reporting efforts by over 70%** and migrating clients from Excel.
- Developed **Python** scripts for Cloud Run jobs to fetch employee data from Zoho People API, processing thousands of records daily with automated **BigQuery** storage for real-time employee analytics.

Scaletrix.ai Remote, India
Data Analyst Intern Aug 2024 – Jan 2025

- Analyzed retail and e-commerce data by preparing custom **SQL** queries and stored procedures for data transformation, improving data accessibility for 10+ types of analyses.
- Led a cross-functional team of 5 to improve data consistency, resolving over **90%** of identified discrepancies using SQL and **Excel** to enhance reporting accuracy and strategic decision-making.
- Built **Power BI** dashboards using DAX to track **KPIs** and deliver actionable insights to stakeholders.

EDUCATION

Sri Venkateswara Engineering College – 8.65/10 Tirupati
Bachelor of Technology in Computer Science and Engineering *2020 - 2024*

PROJECTS

Automating Data Science Workflows using Gen AI(Link)

- Automated an end-to-end MLOps pipeline using Google Cloud's **Vertex AI AutoML** to build, train, and deploy a regression model with a live REST API endpoint.
- Automated Exploratory Data Analysis (EDA) in Julius.ai, generating a comprehensive HTML report with statistics, correlation heatmaps, and data cleaning suggestions.
- Automated creation of 10+ interactive dashboards with Claude AI, delivering diverse key visualizations.

AI powered Portfolio(Link)

- Developed a modern, **AI-powered** interactive portfolio website featuring real time AI chat that dynamically responds to project, skill, and experience queries, enhanced with responsive design.

SKILLS

- **Languages**: SQL, Python (NumPy, Pandas, Matplotlib, Scikit-learn)
- **Data Platforms/Cloud**: Databricks, Trino, Apache Druid, SQL Server, Google Cloud, BigQuery, Cloud SQL
- **AI/ML**: Machine Learning, GenAI and LLM Prompting (Gemini), AI Agents, Claude Skills, Vertex AI AutoML
- **BI/Tools**: Power BI (DAX), ECharts, Excel, Azure DevOps, GitHub
- **Other**: ETL Pipelines, Data Modelling, SQL Migration, Data Cleaning, Dashboarding
